A Study Table

We should always study on study table.
This picture has been made by 'Pencil shading'.
Observe it and make the same on the next sheet.

Cap your Scissors

Material

- Any old cloth
- A sheet of foam
- A sewing needle
- Pencil

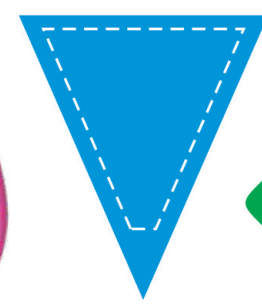

Step 1 : Fold the cloth into a quarter. Draw a triangle as shown. cut it out.

Step 2 : Needle stitch a layer of foam in between the two layers of the cloth.

Step 3 : When the two triangles wit foam padding are complete, snip the apex and stitch the two pieces together from the three sides.

Step 4 : Stick the cord with an adhesive on the inner side of one of the triangles. To make the scissor case look 'fancy', you can embroider the cloth before stitching it.

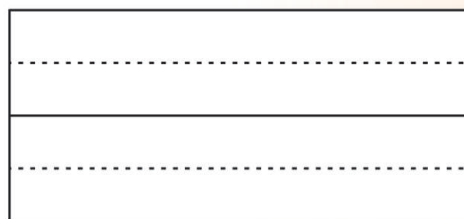

Hang the case where it is easily accessible and secure your scissors.

Fun with Activity

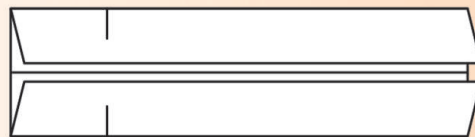

1

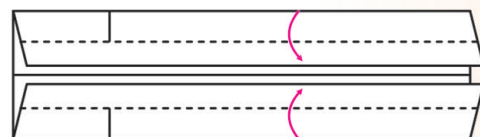

Take a rectangular paper and valley fold it.

2

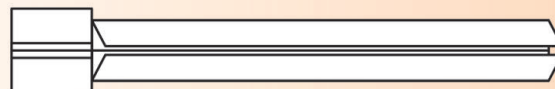

Cut the folded paper, as shown.

3

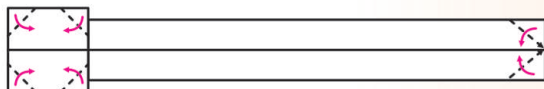

Fold the top and bottom edges along the dotted lines.

4

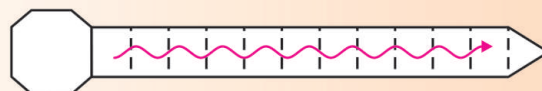

As shown above.

5

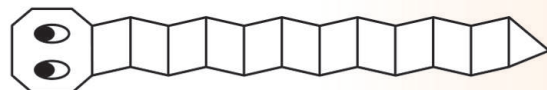

Fold all the side triangles upwards along the dotted lines.

6

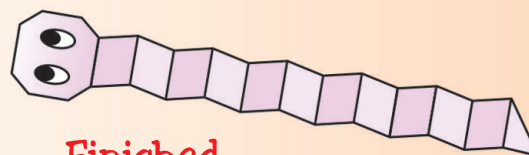

Turn it over.

7

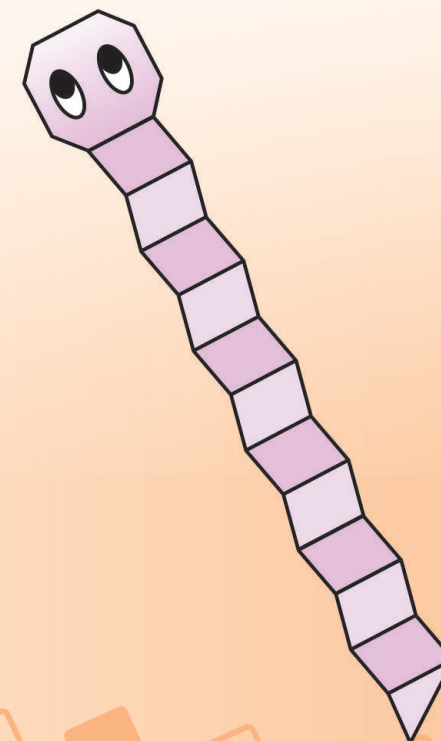

Draw eyes. The snake is ready.

Finished

A Dangerous Snake

Take a paper and start making the paper snake.

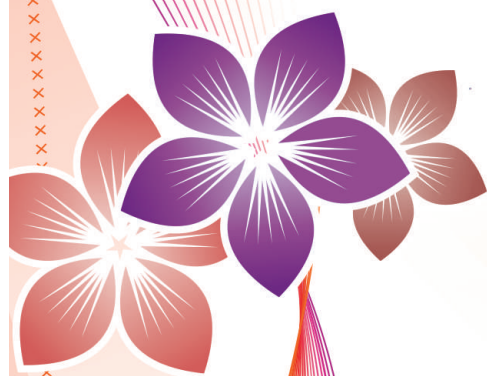

A Tree

Trees help us to provide oxygen. This tree is prepared by thumb painting. Observe it carefully and try to make the same on the next sheet.

Thumb Painting

A Tree

See the previous sheet again and start the activity. Dip your thumb in colour and start making the impressions on the given blank picture of a tree. Also trace it.

Thumb Painting
